## WORLD FULL OF FANTASY

Our company has been producing mattresses, furniture, rehabilitation and recreational equipment and a wide range of products filled with soft polyurethane foam for **10 years** now. We have many products in which everyone will find something interesting. The products in our offer are made by hand, with an emphasis on the high quality, which is ensured by well-trained, long-term employees. Thanks to experience and high standards of work, the final effect of our efforts is a product of exceptional quality and 100% Polish, which we are very proud of. Our company is **environmentally** friendly.

Our products are **CERTIFIED** and comply all safety standards!

We also offer the production of **CUSTOM-MADE** elements. This means product personalization, color selection, and the possibility of choosing your own patch.

### MANUFACTURING PROCESS:

# Foam set?

...it is not just colored cubes...

# it is a world full of fantasy...

... all children like to build houses, bunkers, various shelters and hiding places, where they can hide and play undisturbed in "their children's world"...

EDUFIT's foam sets will give all children of different ages enough space for their imagination and fantasy, and the important thing is, that these games are safe!

**E**DUFIT company places great emphasis on the wide range and variety of manufactured elements. They are foam sets, construction kits, individual blocks, cushions, rehabilitation elements... Of course, our offer also includes elements for various sports activities. All our elements are made of polyurethane foam and are covered with a high-quality covering fabric, leatherette.

**Assemblies and building blocks help children develop both fantasy and imagination, as well as motor skills.**

Swedish foam crates and mats lead children to sports. Sets for the support of motor skills help to develop the coordination of basic movements, the perception of colors and shapes. Foam elements are ideal for children of any age.

All our products are suitable for kindergartens, childcare centers and children's corners.

**They are also very popular in special schools and rehabilitation centers for children with disabilities...**

What do we imagine under the name "Foam set"? ... It is a set of different shapes made of high-quality polyurethane foam and covered with abrasion-resistant leather that can be easily cleaned. Each element can also be removed from the leather case. Individual elements have a zipper. Children have a huge imagination, they very often use things differently and for different purposes than us "adults". This also applies to foam sets, from which you can build a house, a castle, a hiding place, an obstacle course, or simply they just "lay around" on the individual elements...

**Our company mainly emphasizes great variability in the production of sets**

Everything can be combined with each other, on the color scale, whether they are sets in basic colors or individual elements in pastel shades. On [www.edufit.pl](http://www.edufit.pl) you will find a complete offer of all our elements.

**We also offer the production of CUSTOM-MADE FOAM ELEMENTS according to the customer's wishes.**

If you are thinking about how to make children happy in a kindergarten or other facility, what new things to get them, we recommend a foam sets.

It is a choice that will certainly not disappoint children, it will entertain them, develop imagination, gross motor skills, physical fitness, and of course support the development of children's social ties with their peers.

**And what is also important - children forget for a while of "modern" times and return to the world of games and fantasy...**

EDF17150

## ROCKER CAR

- EDF200295 - Firebrigade
- EDF200296 - Police
- EDF200297 - Taxi
- EDF200298 - Ambulance

... Which cover material we choose, depends on what the product will be used for.

Leatherette is more suitable for **SPORTS, EXERCISE** and **PLAY**, because it is abrasion-resistant and easy to clean.

**REHABILITATION SEAT BAGS** are filled with granules and adapt perfectly to the figure. The surface is made of high-quality leatherette, which is easy to maintain.

For the **RELAXATION CORNERS**, combination of cover materials is suitable. Leatherette for more stressed edges, and fabric for the upper parts.
